

Make sense of  
problems and  
persevere in  
solving them.

Reason abstractly  
and quantitatively.

**Construct viable  
arguments and critique  
the reasoning of others.**

Model with  
mathematics

Use appropriate  
tools strategically.

**Attend to  
precision.**

**Look for and make  
use of structure.**

Look for and express  
regularity in repeated  
reasoning.

Don't practice until you  
get it right.

Practice until you  
can't get it wrong!
